ABOUT ME

Motivated Software Engineering student at the University of Karachi with hands-on experience building and shipping full-stack, AI-integrated web applications using React.js, Next.js, Node.js, Express.js, and PostgreSQL. Has independently designed, built, and deployed a complete AI-powered product end-to-end, and built a second full-stack application with real-time data visualization and AI-generated insights. Strong communicator and fast learner, eager to contribute to a product engineering team.

EDUCATION

University of Karachi — DCS-UBIT 2024 – Expected 2027
BS Software Engineering
Core coursework: Data Structures, OOP, DBMS, Operating Systems, Software Engineering.
PECHS Government College, Karachi 2021 – 2023
Intermediate — Pre-Engineering

WORK EXPERIENCE

CubelT — in partnership with Project Insaaf Aurum Welfare Association Jun 2026 – Aug 2026
Web Development Intern

- Helped develop CubelT's official website and Nexora Workspace, CubelT's internal workspace platform, as part of a two-month internship on the development team.
- Worked with the team on assigned feature tasks, testing, and technical documentation, following professional software-development workflows and deadlines.

PROJECTS

Deployed on Vercel & Render
Interview Prep Platform — AI Mock Interview Coach
Next.js · Node.js · Express.js · PostgreSQL · Google Gemini API · NextAuth

- Full-stack platform for AI-driven mock interviews — generates role-specific questions and scores answers live on clarity, structure, and content using the Gemini API.
- Shipped end-to-end with Google OAuth and a live Vercel/Render deployment, resolving a production OAuth redirect URI mismatch along the way.

Core build complete, ready to deploy

Finance Dashboard — AI-Powered Personal Finance Tracker
Next.js · TypeScript · Tailwind CSS · Framer Motion · Recharts · Node.js · Express.js · PostgreSQL (Prisma) · Gemini API

- Full-stack finance tracker that visualizes spending through animated charts and budget bars, with a normalized Prisma/PostgreSQL schema and REST API for transactions, budgets, and CSV/receipt import.
- Gemini API auto-categorizes transactions and generates natural-language monthly insights from a user's real spending data.

SKILLS

- JavaScript / TypeScript
 - React.js / Next.js
 - HTML / CSS
- Node.js / Express.js
 - PostgreSQL / Prisma
 - REST API Design
- Gemini & OpenAI APIs
 - Git / GitHub
 - Vercel / Render
